CENTON

PRODUCT DATASHEET

512GB

Professional

Micro Secure Digital

The Centon Professional microSD card is built to a controlled specification for government agencies, contractors, and public-sector buyers who require verified TAA compliance. Manufactured in accordance with the Trade Agreements Act, it meets sourcing requirements for GSA Schedule and other federal procurement contracts. Centon sources qualified components from multiple suppliers and builds each card to one specification, delivering dependable, lifecycle-stable storage for phones, drones, and other devices.

512GB

TAA COMPLIANT

CONTROLLED SPECIFICATION

LIFECYCLE STABLE

2-YEAR WARRANTY

FEATURES

01 TAA COMPLIANT

Meets Trade Agreements Act requirements for U.S. Government and GSA Schedule procurement, ensuring eligibility for federal purchase.

02 CONTROLLED SPECIFICATION

Built to a single Centon specification, using qualified components from multiple suppliers.

03 LIFECYCLE STABLE

Dependable supply for system integrators and builders, at a commercial-grade price.

ABOUT THE PROFESSIONAL SERIES

The Centon Professional Series is built to a controlled specification. We qualify NAND, controllers and components from more than one supplier and build every unit to that specification, so volume orders stay consistent and well priced without giving up quality. Tier-one components and 100% post-production testing, made to JEDEC standards for everyday commercial work, without paying for industrial or automotive grades you do not need.
