microSD (micro Secure Digital) integrates NAND flash and an onboard controller into a compact, removable card with a standardized SD interface, delivering self-managed, capacity scalable storage that drops into a range of devices from consumer to embedded designs. Experience the reliability of our Professional series 256GB microSDXC UHS-I Class U1 flash memory card.

ABOUT THE PROFESSIONAL SERIES

The Centon Professional Series is built around a controlled specification rather than a fixed bill of materials. This lets us source top-quality components from multiple suppliers to meet your spec at the best possible price, without compromising quality. For system integrators and builders, it delivers dependable, lifecycle-stable products that balance performance, availability, and cost. JEDEC standard designs, reliable for everyday commercial workloads without paying for industrial/automotive grade you don't need.
